

Primary Driving Controls

Input devices are those that directly affect the motion of the vehicle. They are broken down into 3 categories: Steering Only, Gas/Brake Only, and Steering and Gas/Brake.

J-Series

The J-Series input device is a gas, brake & steering control that utilizes a multi-axis joystick input device.

X/Y-Series

The X-Series is a steering control and the Y-Series is a gas & brake control that utilizes a single axis joystick.

W-Series

The W-Series is a vehicle steering control that utilizes a 5" diameter wheel input device.

L-Series

The L-Series is a gas & brake control that utilizes a lever input device.
